

Our <Theory of Change> approach

A: Key Assumptions

partners can significantly influence children, youth, families and communities using the power of sport | the political, social and economic environment is conducive to the partners' sustainability | the partnerships are based on the desire for learning, innovation and adaptation plus capacity building for a sustainable improvement | projects follow a holistic approach considering local solutions for local problems

B: Programme Context

Problem statement
those who are less fortunate and underprivileged, especially young people

Our Foundation & its object
to use the power of sport to contribute towards and to enhance the prospects of underprivileged and vulnerable young people by creating sustainable opportunities and by building flourishing lives and communities

Desired vision
young people, empowered through sport, leading improved lives and fulfilling their potential

C: Programme Efficiency

Inputs - resources needed for implementation ...

human resources

financial resources

network & relationships

accountability

awareness & consciousness

commitment & leadership

... mobilise ... Activities - what we do as an organisation ...

relationship with peer organisations, co-operations, coalitions and networks, conjunction of agents for change

projects & programmes in defined climes with flexible funding approach as well as non-financial support

multi-stakeholder initiatives including internal involvement and opportunities for special and high-impact action

... act ... Outputs - our products, services and facilities provided ...

we identify partner organisations who stimulate underprivileged and vulnerable young people in the need of assistance to improve the quality of their lives recognising that sport has the potential and power to influence and change people's lives

we support and work with implementing partner organisations to address specific social concerns or needs such as poverty, underprivileged youth, deprivation or inequality with a special strategic focus on girls empowerment and/or inclusion

External Enablers

structured processes within the external environment including relevant social, cultural, economic, legal and political factors, regulations and co-operations

F: Delivery

Internal Enablers

structured processes with involvement of the SOL-office, SOL's Foundation Board, any advisors and/or other parties of the internal organisation

D: Programme Effectiveness

... transform ... Intermediate Outcomes and ...

project partners acquire new or strengthened relationships promoting positive social values including respect and empathy in the context of sport

project partners improve their programmes based on learning, further knowledge and skills or attitudes relating to aspirations, determination & confidence

project partners become stronger agents of change through organisational improvement, aspects are leadership, monitoring & evaluation

... Long-term Outcomes and generate ...

project partners increase performance, impact & sustainability in evidence within their communities of change

project partners improve measurable results as more influential local agents of change with greater visibility

children & youth perceive their central role, are empowered, experienced new perspectives and chances

E: Impact

Synergy
shared understanding of aims and targets within a consistent co-operation

Final goal: social change
the power of sport has contributed towards and enhanced underprivileged and vulnerable young people whose well-beings have improved through the provided opportunities in a safe and sustainable way

Transferred vision
young people, empowered through sport, leading improved lives and fulfilling their potential

We promote SOcial change.
